EXPERIENCE

Frontend Developer, Hector AI

Nov 2023 - Present

- Designed and implemented interactive data visualizations, such as charts, graphs, and tables, using libraries like **HighChart** to present complex data sets in a comprehensible and actionable format.
- Integrated with backend APIs to fetch and display real-time **Amazon data**, including sales performance metrics, advertising campaign analytics, and inventory insights, in the frontend dashboard.

Frontend Developer, Yapsody India

May 2022 - July 2023

- Built an email marketing application with dynamic **GUI email template editor**, allowing users to create and send campaigns with segmented lists and pre-built templates.
- Developed a dynamic email template editor for the email campaigns app that lets users easily customize and **rearrange email components**, including images, text, buttons, and social media icons, to create responsive emails.

Web Developer, Freelance

May 2019 - 2022

- Built **E-Learning platform** feature such as Adding Homework, Adding Lecture Videos, Photo Gallery, Add Notice and News. and **Hosted Media on AWS.**
- Utilized Django and Postgres to build a reliable back-end for web applications, focusing on scalability and performance optimization.

PROJECTS

#Campaign Manager

Yapsody Campaigns is a very easy to use email provider service, build for organizations to manage their communication.

#React Emoji Collection

Simple React app for searching emoji

- Implemented frequently used with LRU cache.
- Copy emoji to clipboard on click.
- Debounced emoji search for better search performance.
- Implemented scrollspy with IntersectionObeserver API.

#Abhay Nobles High School

A modern e-learning platform for Abhay Nobles High School.

MY BLOGS

When to use memo in React
